

ELECTROTEHNICĂ, ENERGETICĂ, ELECTRONICĂ

CONTENTS

	<u>Pp.</u>
Artificial intelligence and expert systems	
<u>VIRGINIA IVANOV, MARIA BROJBOIU and S. IVANOV, The reliability analysis of electrical grids using expert system</u>	1
<u>S. MUȘUROI, M. SVOBODA, V. OLĂRESCU and C. ȘORÂNDARU, Modeling and simulation of a version of fuzzy control for permanent magnet synchronous machine</u>	5
<u>M. SVOBODA, C. ȘORÂNDARU, V. OLĂRESCU and S. MUȘUROI, Modeling and simulation of a version of neuronal control of the permanent magnet synchronous machine</u>	11
<u>D. POPESCU, NIRVANA POPESCU and ANA-MARIA BEJAN, Intelligent system for road traffic management based on weather analysis</u>	17
<u>GH. GRIGORAS, GH. CARTINA and V. ALEXANDRESCU, An improved method for power losses determination in rural distribution networks</u>	23
<u>M. PISLARU, A. TRANDABAT, I. NICA and S. URSACHE, Fault diagnosis detection using a neuro-fuzzy system</u>	31
Bio-, Nano- materials & technologies applied in electrical engineering	
<u>ELENA-TAINA AVRAMESCU, ILONA ILINCA, L. G. GRUIONU and C. NEAMTU, New approaches in human movement analysis – enhancing data generation, standardisation, acquisition and analysis systems applied in sport</u>	39
<u>CLAUDIA RĂCĂȘAN, V. TOPA, ADINA RĂCĂȘAN and C. MUNTEANU, On-chip, three-dimensional inductance modeling and extraction</u>	47
<u>ADINA RĂCĂȘAN, C. MUNTEANU, V. TOPA and CLAUDIA RĂCĂȘAN, Tehniques to reduce the insertion losses in EMI filters with magnetic planar technology</u>	55
<u>A.SEZAI SARAC and R. CIOBANU, Charge effect on the electrochemical impedance of poly (2,2 -diakyl-3,4-propylenedioxythiophene) coated carbon fibre electrode</u>	63
Electrical apparatus	
<u>C. PANCU, A. BARABOI, M. ADAM and A.T. PLEȘCA, Wireless solution for monitoring, diagnostic and control of circuit breakers</u>	73
<u>J. PERDAN, R. KAMNIK, T. BAJD and M. MUNIH, Systems and methods for hand sensorimotor capability augmentation</u>	79
<u>A. CRETU and C.G.HABA, Two-stage voltage transformer with electronic compensation</u>	85

<u>E. HNATIUC and A. PLEȘCA, The return transient regime at single phase electromagnets operating type E – I</u>	93
<u>E. HNATIUC and A. PLEȘCA, The return transient regime at single phase electromagnets operating type U – I</u>	99
Electrical energy transport and distribution	
<u>GH. HAZI, A. HAZI and V. PETCU, Energy losses calculus of the low voltage network using type load curves</u>	107
<u>T. CHIULAN and BRÂNDUȘA PENTELIMON, Measurement methods of the main monitored parameters of the large power transformer units</u>	115
<u>D. RUȘINARU and C. BRATU, Optimized compensator' configurations for load current symmetrization</u>	123
<u>C. BRATU, D. RUȘINARU and S. DIGĂ, Computer based design algorithm for overhead lines profiling</u>	131
<u>GH. GEORGESCU, V. VARVARA and B. NEAGU, Possibilities of survey and shape the consumption from the electric energy distribution systems</u>	139
<u>GH. GEORGESCU, V. VARVARA and B. NEAGU, The impact of the electric energy transmission lines on the telecommunication lines</u>	147
<u>M. HORGOS, L. PETREAN, L. NEAMT and O. CHIVER, The calculation of short circuit currents and Matlab/Simulink simulation for an industrial consumer</u>	155
<u>Z. ERDEI, M. HORGOS and L. PETREAN, Analysis and monitoring a connection to the electrical network for a industrial consumer</u>	161
<u>M. HORGOS, L. PETREAN, L. NEAMT and O. CHIVER, Matlab/Simulink simulation of some short circuits from the electric supplying scheme of a consumer</u>	167
<u>M. ISTRATE, Fault location in distribution grids in an atp approach</u>	173
<u>E. NASR AZADANI, S.H.HOSSEINIAN and J.MOGHANI, Market clearing considering power system security</u>	179
<u>C. NEMES and Fl. MUNTEANU, Equipment reliability analisys using the probabilistic design methodology</u>	185
<u>FR. SZOMBATFALVI – TÖRÖK, E. SIMION, A. CECLAN, D. D. MICU and L. CZUMBIL, On some measurements of energy quality in the national electrical power grid – part I</u>	193
<u>FR. SZOMBATFALVI – TÖRÖK, E. SIMION, A. CECLAN, D. D. MICU, DENISA ȘTET and L. CZUMBIL, Energy quality evaluation in the national electrical power grid – part II</u>	199
<u>M. ADAM, A. BARABOI and C. PANCU, Aspects regarding of thyristors controlled series compensator</u>	205
<u>GH. GRIGORAS, GH. CARTINA and E.C. BOBRIC, Possibilities for energy saving in electric distribution networks</u>	211
Electromagnetic field	
<u>A. SĂLCEANU, OANA NEACȘU and E. LUNCĂ, Study upon the influence of gun orientation and application point in the immunity tests</u>	221
<u>MIHAELA NOVAC, T. LEUCA and O. NOVAC, Induction heating process analysis using inductors with magnetic flux concentrators</u>	227
<u>CAMELIA PETRESCU, Numerical analysis of a coupled electromagnetic-thermal problem using comsol-multiphysics</u>	231
<u>R. DAMIAN, R. CIOBANU and CRISTINA SCHREINER, Investigation of electromagnetic applications of chiral structures</u>	237
<u>V. DAVID and I. NICA, Numerical simulation with a view to analyse the biological effects of electromagnetic fields</u>	245

<u>A. CECLAN, D.D MICU, L. CZUMBIL, D. O. MICU and E. SIMION, On a Monte Carlo original approach of interference problems</u>	251
<u>C. CURTA, ANCA-IULIA NICU, MIHAELA PLESA, S. CRISAN and R. CIUPA, Magnetic neural stimulator – geometry optimization</u>	257
<u>CLAUDIA OLIMPIA STAŞAC, D. A. HOBLE, The study of inductive heating utilization the joining of „fretaj”</u>	263
Industrial information technology	
<u>C. COSTEA, Agent-based simulation for microgrid operations</u>	271
<u>D. GAFITESCU and CLAUDIA BOTEZ, Vehicle monitoring system using a GPRS tracker device and google maps</u>	279
<u>M. STANCIU, A. BOEV, MIHAELA ALBU, BRÂNDUŞA PANTELIMON, Dynamic monitoring system of heart rate variability parameters</u>	287
Linear and nonlinear circuits	
<u>M.I. NEACĂ, ANDREEA MARIA NEACĂ, The study of the transitory regime when an electric resistive element becomes hot</u>	295
<u>L. MANDACHE, and D. TOPAN, Modeling and time-domain simulation of wired ferromagnetic cores for distorted regimes</u>	303
<u>V. VARVARA and GH. GEORGESCU, The active powers flow in networks running in distorting and nonsymmetrical states</u>	311
<u>H. ROSMAN, Some new reciprocity relations in electromagnetic field, in periodical, non-harmonic steady-state</u>	317
<u>D. BELAUS, Fundamental parameters matrix of the linear four-terminal with reaction impedance on upper side</u>	323
<u>IUSTINA ZAHARIA and CRISTINA TEMNEANU, On the influence of distortion factor in compensated circuits in nonsinusoidal conditions</u>	329
Metrology and measurement systems	
<u>C. DOSOFTEI, M. CRETU and L. TOMA, Advanced waveform sequencing and triggering on arbitrary waveform generators</u>	337
<u>C. DOSOFTEI, M. CRETU, L.TOMA, Advanced signal generator arhitecture: analog output to advenced features</u>	345
<u>OANA COSTEA, C. DONCIU and ALINA SAMOILA, Automated video system instruments test and calibration</u>	351
<u>CĂTĂLINA SELIMAN, D.COSTINEANU, CRISTINA BRĂTESCU and RAMONA BURLACU, Improving the selectivity of electrochemical sensors by compensating interference errors</u>	357
<u>R. DRAGOMIR, DORINA DRAGOMIR, S. PUSCOCI and BRANDUSA PANTELIMON, Some measurements anomalies with optical time domain reflectometer....</u>	363
<u>M. V. PAULET, OANA MARIA NEACŞU, L. TOMA and M. CRE(U, Virtual laboratory</u>	369
<u>L. TOMA, M.V. PĂULET and OANA NEACŞU, Virtual filters for multirate signal processing in instrumentation</u>	375
<u>L. TOMA, C. DOSOFTEI and M. CRETU, Simulation of a phase locked loop using Labview</u>	381
<u>E. LUNCĂ, V. DAVID, A. SĂLCEANU and OANA NEACŞU, Broadband magnetic field meter</u>	387
<u>OANA NEACŞU, L. TOMA and S.I. URSACHE, Rendering the measurements of the near fields associated with ESD experiments</u>	393

<u>DORINA DRAGOMIR, R. DRAGOMIR, S. PUSCOCI and BRANDUSA</u>	
<u>PANTELIMON, Telecommunication optical cable for oil pipeline application</u>	399
<u>E. LUNCĂ, V. DAVID, S.I. URSACHE and M. CREȚU, On the EMF exposure due to</u>	
<u>video display units</u>	405
Quality, reliability and maintenance	
<u>D.C. SECUI, Modeling and evaluation of power distribution system reliability including</u>	
<u>reclosers</u>	413
<u>D.C. SECUI and I. FELEA, Probabilistic characterization of the operational behavior for</u>	
<u>the 110KV/MV power transformers</u>	419
<u>O. NOVAC, MIHAELA NOVAC and GIANINA GABOR, Implementing hamming codes</u>	
<u>to the cache level of a memory hierarchy</u>	427
<u>D. CIUREA ,R. RUSEI AND ana CRISTINA BRATESCU, Expert systems for quality</u>	
<u>service management and maintainance</u>	433
<u>D. CIUREA, R. RUSEI AND RAMONA BURLACU, Project quality management within</u>	
<u>services</u>	441
<u>M.E. ARDELEANU, Aspects concerning the importance to know the partial discharges</u>	
<u>level in decisional act</u>	447
<u>F. MUNTEANU, C. NEMES, Human reliability influence on systems maintenance</u>	455
<u>R. RUSEI, M. PISLARU, R. CIOBANU and D. CIUREA, Systems for industrial</u>	
<u>processes quality improvement</u>	461
<u>TRINH TRONG CHUONG, Voltage stability investigation of distrbution network</u>	
<u>connected wind power generation</u>	467
<u>CRISTINA HORA, Availability evaluation of the hydro generator groups by Monte Carlo</u>	
<u>simulation</u>	475
Thermal and electrical power generation	
<u>ION SOBOR, ANDREI CHICIUC, The estimation of wind energy potential of Republic</u>	
<u>of Moldova</u>	485
<u>R.C. DINU, C. BRATU and I. MIRCEA, Gas – turbine cogeneration systems functioning</u>	
<u>analysis in unrated duties</u>	493
<u>P. ATĂNĂSOAE, Trigeneration, an efficient solution for the combined heat and power</u>	
<u>plants of Romania</u>	499
<u>F.N. ALEXE and V.E. CENUȘĂ, Comparatively optimizing the feed water preheat and</u>	
<u>the reheat pressure for condensing steam cycles</u>	503
<u>F.N. ALEXE and V.E. CENUȘĂ, Correlatively optimizing the regenerative feed water</u>	
<u>preheat and the reheat parameters for condensing steam cycles</u>	511
<u>C. P. ION, C. MARINESCU and L. CLOTEA, Unbalances compensation for a three-</u>	
<u>phase autonomous induction generator</u>	519
<u>I. ȘERBAN and C. MARINESCU, An optimal solution for the power management of a</u>	
<u>hybrid power system with renewable energy sources</u>	527
<u>A. HAZI and GH. HAZI, Model for simulation of conventional drying of paper</u>	535
<u>A. DUINEA and I. MIRCEA, Modelisation mathematique d'economiseur du chaudiere</u>	
<u>avec circulation naturelle</u>	541
